

The RH-ISAC welcomed its largest crowd to date to the 2020 RH-ISAC Cyber Intelligence Summit with over 400 attendees. Throughout the three-day virtual event, attendees participated in panels, networked, heard insightful presentations from industry thought leaders, and built new relationships to help our industry protect as one. Different tracks tailored to all levels of an organization – from CISO to analyst – allowed each attendee to gain helpful insights relevant to their profession. The new virtual platform offered attendees opportunities to interact with each other, sponsors, and presenters in a way that felt like an in-person event. A big thank you to the RH-ISAC [sponsors](#) and [presenters](#). RH-ISAC was honored to have so many influential organizations and individuals that wanted to be part of the 2020 RH-ISAC Summit! All attendees have access to recorded sessions via the [virtual event platform](#). Attendees will have a year to go back and watch any sessions missed or revisit content.

We hope you enjoy reflecting on the RH-ISAC Summit and encourage you to contact the membership team at membership@rhisac.org to explore opportunities to lead with the RH-ISAC.

The Buzz

Colin Anderson
Global CISO
Levi Strauss & Co.

“Thank you for all the work that went into making the RH-ISAC Summit a great success. I have attend a few virtual conferences and summits over the last several months and I think the RH-ISAC Summit was the best of the bunch. You picked an excellent platform for the conference and put together relevant topics and great speakers. What I liked most is that the majority of the speakers were from our member companies which is unique.”

Albert Chen
Senior Security Analyst
Expedia Group

“The RH-ISAC Summit has been a great forum for industry professionals to openly share experiences in laid-back and candid conversations.”

Nick Leicht
IT Risk Management Engineer
